

Database Services.

Database construction is a manual, laborious process

It's easy to get it wrong and undermine most, if not all, of its value

Source

... OEM
equipment
manuals

Digitize

... sourced OEM
data manually

Input

... and
standardize OE
M data into
database

\$12k - \$30k • **5 - 12** weeks
per site

After the implementation into your office and site systems, the database will require... well, maintenance!

Initially developed datasets during implementation, like maintenance plans and part lists, change over time:

- Quality and HSE findings
- Company improvements
- OEM service letters and defect investigations
- Flag state requirements, insurance

\$5k - \$12k

a year

Spent to manually capture, review, process and implement changes on each site

or...

Without this investment your system will very fast loose effectiveness, adding costs to maintain competitive advantage

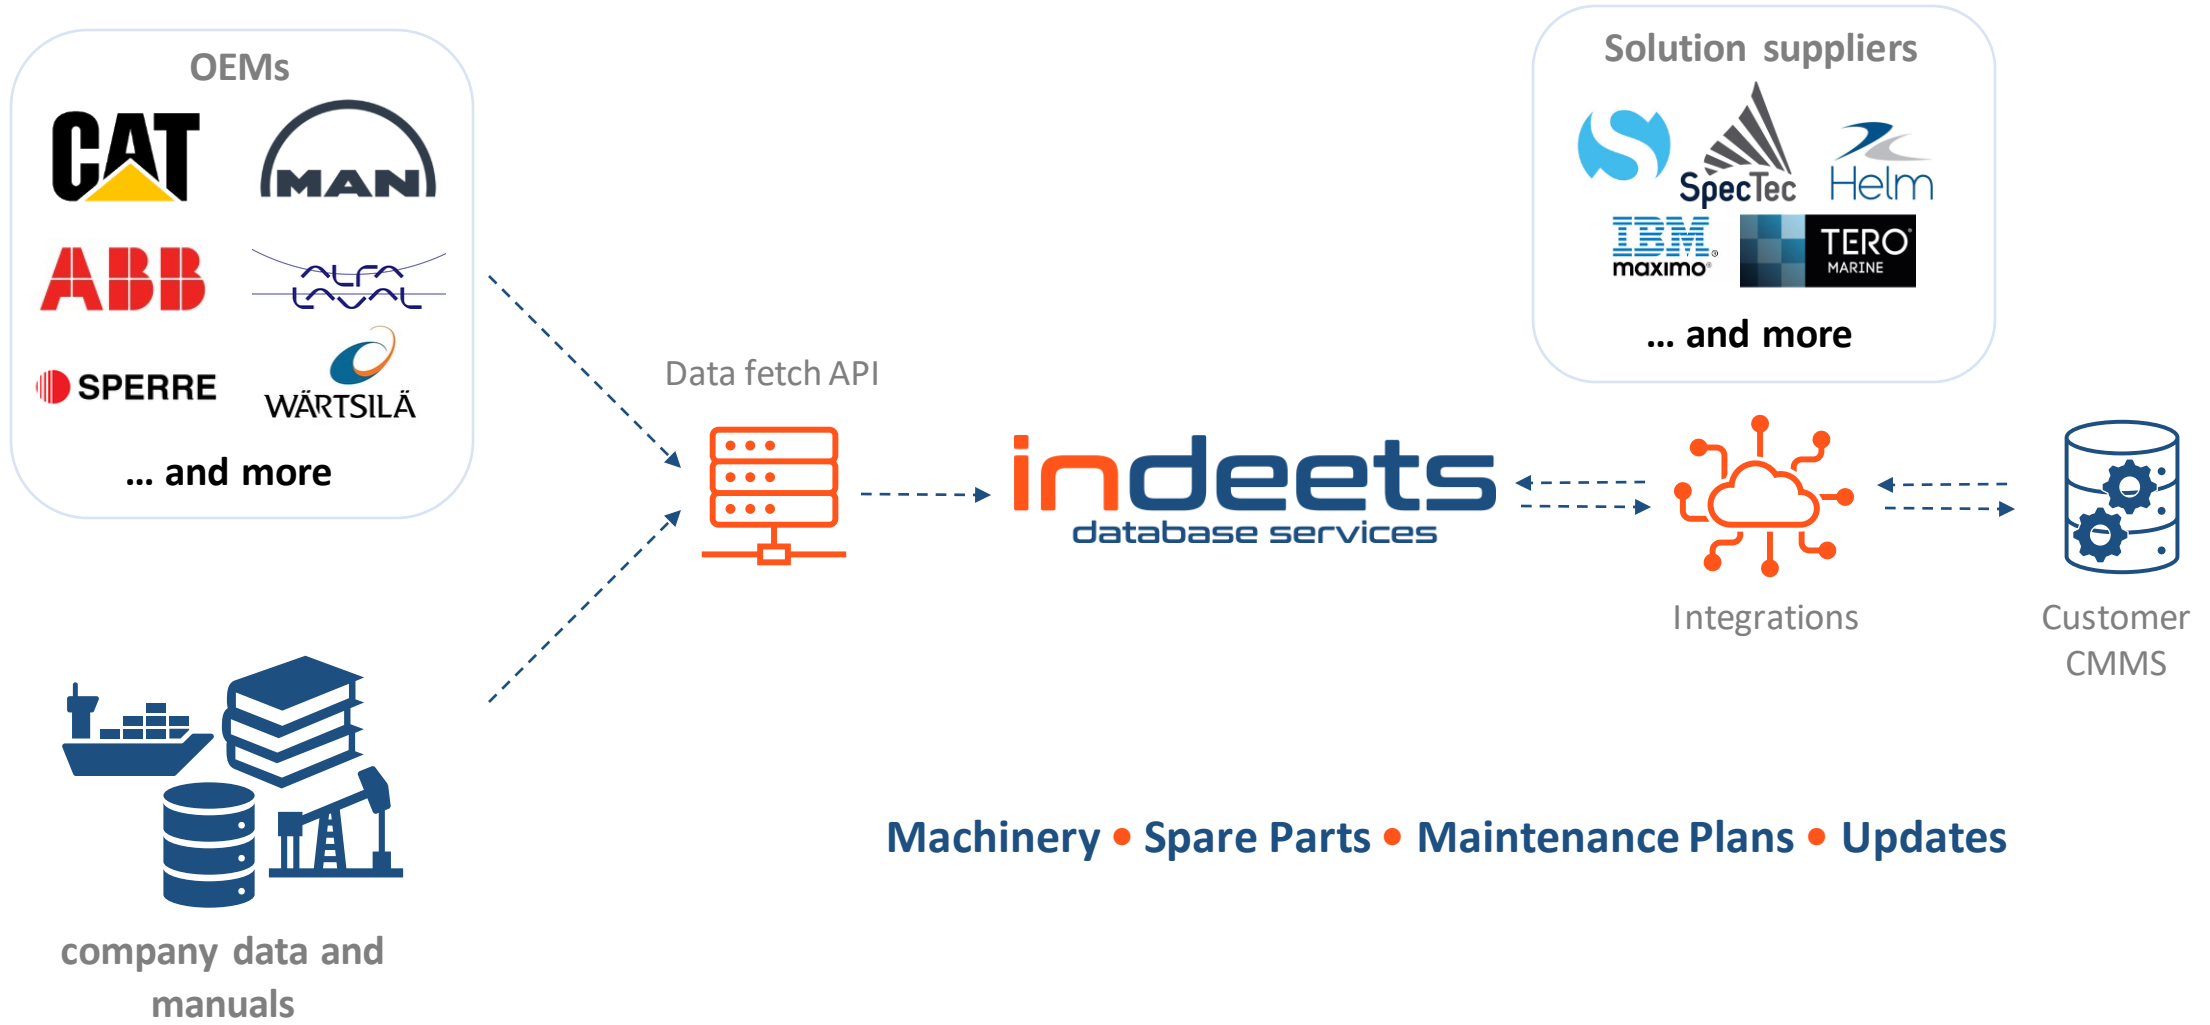

AUTOMATES

CMMS Implementation and data maintenance

How does it work?

We are connected to OEM databases and integrate with CMMS products

With Indeets the process is easy and reliable

Just let us know what machinery and we will do the rest

~~\$12k - \$30k • 5 - 12 weeks~~
\$5k - \$15k • 2 - 5 weeks
per site

**After the implementation,
your system will always be performing at its max!**

Basic

- OEM Service Letters Updates

Pro

- OEM Service Letters Updates
- Remote sites synchronisation monitoring and troubleshooting

Premium

- OEM Service Letters Updates
- Remote sites synchronisation monitoring and troubleshooting
- End users support
- Full software administration

~~\$5k - \$12k~~

a year

Spent to manually capture, review, process and implement changes on each site

or...

Without this investment your system will very fast lose effectiveness, adding costs to maintain competitive advantage

No more manual work!
Enjoy your updates automatically and let our team take care of the overall health of your system.

Starting from **2k** per year

We work directly with manufacturers to automate PMS implementations. Our customers implement faster and obtain more from their CMMS.

Our Database Services can help you in a few ways:

- **Automate** your implementations with OEM recommended maintenance plans
- Obtain more than your **competitors** with OEM service updates
- Reduce costs associated with data entry of more than **50%**
- **Eliminate** garbage-in garbage-out
- Reduce the cost of maintaining your CMMS up to **30%**
